

## RAPID BUSINESS CONTINUITY MATURITY ASSESSMENT

Take the first step toward revitalizing your Business Continuity Management Strategy.

A Business Continuity Plan (BCP) affects every part of your organization, making it potentially one of the most complex projects you'll undertake. GreenPages' Rapid Business Continuity Maturity Assessment helps you get started quickly and effectively.

### OVERVIEW

Business Continuity Plans (known in Public Sector markets as Continuity of Operations Plans) are designed to protect your business by driving decisions and business workflows in the event of emergencies such as natural disasters, utility outages, cyber-attacks, or health crises. Toward that end, industry and government regulations including ISO 22301 and NIST 800-34 were created to ensure organizations can smoothly run their businesses when faced with these challenges. Because of their complexity however, BCP strategies often become "boil the ocean" initiatives, resulting in organizations failing to develop mature and functional BCPs.

### RAPID BUSINESS CONTINUITY MATURITY ASSESSMENT

To help clients revitalize and streamline the process, GreenPages has developed a Rapid Business Continuity Maturity Assessment that evaluates the current state of your BCP and identifies the appropriate actions necessary to produce a reliable BCP that is properly aligned with the business. Our assessment methodology scores your organization across the seven critical functional areas that are essential to all BCPs:

- ✔ BCP Scope, Objectives, and Stakeholder Identification
- ✔ Business Impact Analysis and Acceptable RTOs and RPOs
- ✔ Incident Response and Recovery Workflows
- ✔ Business Continuity Management System (BCMS) Policy and Governance
- ✔ Crisis Management
- ✔ BCP Testing
- ✔ BCP Documentation and Change Management

Conducted remotely by GreenPages' senior advisory staff, our Rapid Business Continuity Maturity Assessment will help you generate real change and sustainable impact to your Business Continuity posture by:

- ✔ Highlighting the capabilities of your plan compared to best practices
- ✔ Identifying the strengths that you have cultivated and need to continue to develop
- ✔ Highlighting key areas of weakness and gaps that need immediate attention and resolution
- ✔ Identifying infrastructure issues that need to be examined and considered as part of a broad solution
- ✔ Creating the foundation for a more enduring and impactful continuity plan

**It's Easy to get Started! Contact your GreenPages Account Manager or [sales@greenpages.com](mailto:sales@greenpages.com) to set up your Rapid Business Continuity Maturity Assessment.**

## THE PROCESS

### DISCOVER
